

HORTICULTURAL SCIENCE SUMMER INSTITUTE

July 10-15th, 2016 at North Carolina State University

HIGH SCHOOL STUDENTS are invited to spend a week discovering the many facets of the Department of Horticultural Science at NC State University. The HSSI students will have hands-on opportunities designed to engage them to the many career opportunities within horticulture. They will experience breeding better fruits and vegetables, propagate a diverse selection of woody ornamentals, lengthening the life of cut flowers, learning sustainable production and design practices and delving into practical tools that enhance our understanding of plant processes. Students will visit unique and innovative North Carolina farms, markets, greenhouses and gardens. Youth will also explore college-making decisions and leadership development, enjoy evening entertainment and team-building activities, live in a campus residence hall with campus dining. The camp provides an close-knit forum for students across the state (and country) to gather together and broaden their interest and knowledge about horticulture.

Any high school student with an interest in a career in the horticultural industry is encouraged to apply to the summer institute. The cost for the week is \$550 and includes lodging on campus in the dorms, most meals, field trips, workshop materials, and entertainment. There may be some scholarships for participants with financial need, or payment plans can be arranged, please contact Liz Driscoll, program coordinator at liz_driscoll@ncsu.edu.
